

Acrylic Tamer

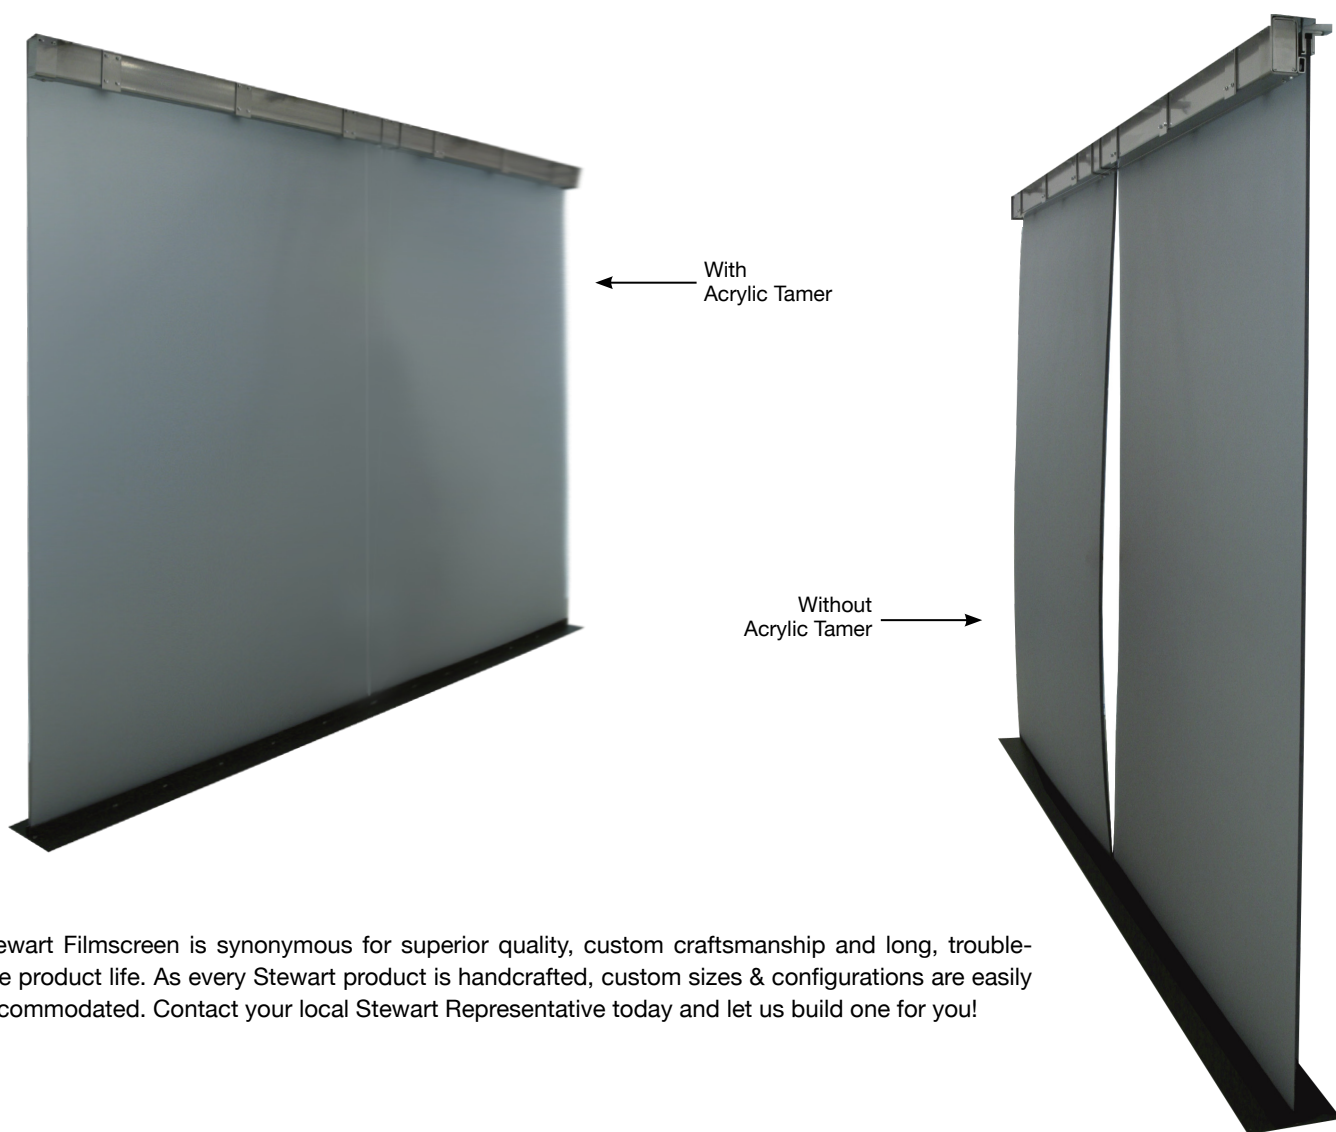

Ensures flatness of acrylic screens available in sizes up to 9 feet high by 24 feet wide

Acrylic Tamer

Stewart's Acrylic Tamer provides an adjustable frame that literally 'tames' the acrylic material. While acrylic screens certainly have their uses, especially in boardrooms, conference rooms, training rooms and large video conferencing suites, jumbo sizes up to 24 feet wide have a tendency to warp or appear wavy.

Stewart performs a secondary process that cross-links poly methyl methacrylate (PMMA) molecules to ensure flatness. Then the adjustable hanging frame 'tames' the malleable acrylic and prevents it from warping or changing shape. It levels the screen from left to right and stabilizes it from the bottom. The frame is available in sizes up to 9' x 24' wide.

Stewart Filmscreen is synonymous for superior quality, custom craftsmanship and long, trouble-free product life. As every Stewart product is handcrafted, custom sizes & configurations are easily accommodated. Contact your local Stewart Representative today and let us build one for you!
