

# Cabaret Screen

Its sleek and stylish contemporary design allows the Cabaret Screen to seamlessly blend into any environment

# Cabaret Screen

This is the first Stewart retractable screen created especially for the lifestyle customer. With a beautiful new housing, the Cabaret Screen offers an innovative approach to roll down screens. It's perfect for multimedia room installations including conference rooms, boardrooms or lunchrooms. The stylish removable aluminum valance comes in various finishes, and can be customized with the color or fabric of the client's choosing. Customization can either be done on site or at Stewart's factory. Its sleek and contemporary design makes it possible to install a front projection system into any size space, with any décor and even though it is exposed it can seamlessly blend into any environment.

In addition to being a beautiful addition to any multi-media environment, the Cabaret Series frame was constructed to make installation quick and easy. For instance, the sliding adjustable wall-mount bracket allows installers to make adjustments from the front. Additionally, a cable management system is built-into the frame to ensure an uncluttered appearance hiding power and home automation connections. The ease and flexibility of installation extends to the motor unit as well, giving installers the option of using any motor they choose including Lutron QS and Legacy 120v quiet motors.

For video conferencing rooms where both a flat panel TV and retractable front screen are desired, a special mount allows the Cabaret Screen to be installed above a TV (or picture frame). The mount has a cantilevered design so that the screen is deployed without touching the flat panel TV. Mood lighting is also available in cobalt blue or white, which slightly illuminates the room for a more comfortable viewing experience.

The stylish and designer friendly Cabaret Screen is a perfect compliment to the customizable Ambience Shade, an exclusive window treatment from Stewart that helps control the amount of sunlight coming in from window.

49' x 87' FireHawk G3 with 3" of black drop **\$3,999**  
With optional mood lighting **\$4,599**

Available in many colors
